Webpage Access

Powered over Ethernet, plug a unit into an existing or unique network and easily access your devices.

Simply access “Alignarray” via any web browser on your computer or smart device.

Turn your laser on / off.
Read the incline accurately regardless of orientation.

A Blinking laser can be easier to detect. Set desired blink rate and laser timeout.

Management Functions allow access to a password protected page which includes your ability to set a unique IP address for your device, update firmware, set passwords and service functions.

Introducing....
